<i>Bachelor of Information Systems (Hons.) Intelligent System Engineering</i>	3.64 CGPA
• Universiti Teknologi MARA (UiTM) 2023 – 2025 ○ Relevant modules: Machine Learning, Data Mining, Business Data Analytics	
<i>Diploma in Computer Science</i>	3.32 CGPA
• Universiti Teknologi MARA (UiTM) 2020 – 2022 ○ Relevant modules: Visual Programming, Interactive Multimedia, Object Oriented Programming	

WORK EXPERIENCE

<i>Data Annotator Specialist</i>	
• TDCX October 2025 – June 2026 ○ Curated and labeled English audio datasets by transcribing content and tagging speaker roles and emotional tone, ensuring high-quality structured data for downstream ML models ○ Partnered with Quality Assurance teams analyzing annotation error patterns to identify recurring ambiguity themes, informing guideline refinements ○ Consistently achieved a 97% annotation accuracy rate, surpassing the 95% team KPI and establishing a high benchmark for data quality through strict protocol adherence ○ Selected for specialized projects based on strong performance and contributions to overall data quality	
<i>Data Analyst Intern</i>	
• Lembaga Tabung Haji March 2025 – June 2025 ○ Assisted dashboard development using Power BI to support reporting and decision-making across departments ○ Supported internal IT systems by managing service requests, coordinating with technical teams, and ensuring timely issue resolution ○ Supported Operasi Haji Tanah Air (OHTA) at Movenpick Hotel and KLIA, handling pilgrim registration, logistics, and technical system setup.	

PROJECTS

<i>Personal Project</i>	
• TMDB Ingestion Pipeline & Revenue Predictor 2026 ○ Designed a normalized PostgreSQL schema and Python pipeline ingesting TMDB movie metadata via REST API ○ Ongoing: Developing a movie revenue prediction model performing feature engineering and EDA on the ingested dataset to identify drivers of box office performance • Satellite Image Processing 2024 ○ Program for viewing any area and time range on the planet with European Space Agency's Sentinel-2 satellites ○ Outputs optical and radar images with contrast enhancement techniques (LCE, BCET) ○ Performs band operations (NBR, NDVI, TCC, FCC) and cloud masking	
<i>Final Year Project</i>	
• Deepfake Voice Detection System 2025 ○ Processed and analyzed the ASVspoof audio dataset, extracting MFCC and spectrogram features to identify distinguishing patterns between real and AI-generated voices. ○ Engineered and evaluated CNN and RNN architectures, tuning hyperparameters to improve classification performance.	
<i>Hackathon Project</i>	
• IBM Hackathon 2024 ○ Participated in and achieved a Top 10 placement in a hackathon challenge focused on utilizing generative AI to solve business problems ○ Fine-tuned CodeLlama-7B and deployed it via Streamlit to deliver a web-based application prototype	

SKILLS	CERTIFICATES
Languages • English, Malay Computer Skills • Python, SQL (PostgreSQL), Microsoft Power BI, Tableau, Microsoft Excel, Jupyter, Git Libraries & Frameworks • Scikit-learn, Matplotlib, Seaborn, SQLAlchemy, psycog2	• Introduction to Intelligent Virtual Agents (IVAs) with IBM watsonx Assistant • IBM watsonx.ai Technical Essentials • IBM watsonx Orchestrate Build an AI Assistant • Enterprise Design Thinking Practitioner (IBM) • 5G Pioneers program (ERICSSON)
